**Crop Production:: Cereals:: Rice:: Wet Seeded Rice** 

## **After Cultivation**

- Thinning and gap filling has be done on 14 21 days after sowing, taking advantage of the immediate rain.
- If dual cropped with green manure, incorporate the green manure when grown to 40cm height or at 30 days after sowing, whichever is earlier, using Cono-weeder.
- · Green manure incorporated fields may be operated again with rotary weeder a week later in order to aerate the soil.
